

Committee 30

8 October 1975

NOTE FOR []

I had a brief discussion with [] today in connection with the new WSSIC Committee. [] says he is quite prepared to take on the ship building responsibility previously faced in EIC, and the DCID he is drafting to cover his new committee takes account of this.

STAT
STAT

[] said, however, that he does not want to merely inherit the same people who have been working the ship building problem in EIC. He wants to set up a working group made up of representatives who will work the ship building problem in a WSSIC context.

Is this a problem? (I am sympathetic with [] objective here.)
